

Data Process Template

Weicong HUANG, stalwarthuang@outlook.com

December 2024

1 Data Name

1.1 Data Source

1.2 Documentation Source

A brief introduction of the data: including what information the data contains, the sample period, and the number of observations and columns.

2 Data Explore

The goal of this subsection is to explore the raw data so as to get an understanding of the dataset.

2.1 Data Structure

What the data source is about and what is(are) the identifier(s) that uniquely identify each row?

2.2 Column Meanings

What is the meaning of each column? Fill the table below.

Column Name	Meaning	Theoretical Value Range
-------------	---------	-------------------------

2.3 Duplicates

3 Data Process
